odyne LiDAR ens Megafactory San Jose for ge-Scale duction of 3D AR Sensors

Business Wire January 17, 2017

Velodyne LiDAR San Jose Mega Factory (Photo: Business Wire) [Multimedia Gallery URL](#)

MORGAN HILL, Calif.--(BUSINESS WIRE)--

Velodyne LiDAR Inc., the recognized global leader in Light, Detection and Ranging (LiDAR) technology, today announced the opening of a Megafactory that will significantly ramp up production of the latest 3D LiDAR sensors to meet high global demand.

This Smart News Release features multimedia. View the full release here:

<http://www.businesswire.com/news/home/20170115644/en/>

Located in San Jose, CA, the enormous facility not only has enough space for high-volume manufacturing, but also for the precise distance and ranging alignment process for LiDAR sensors as they come off the

systems around the world.

"This Megafactory provides Velodyne LiDAR the space it requires to manufacture its cutting edge, long range sensors in a single location, as well as the ability to scale to meet growing global customer demand for LiDAR while pursuing an aggressive growth strategy," said Mark Shandley, vice president of operations, Velodyne LiDAR. "In addition, the location in Santa Clara County is ideal, as it allows us to produce LiDAR sensors in the US with a skilled workforce alongside precision robotic manufacturing processes so we can continue to grow and deliver world-class products."

In addition to the San Jose Megafactory, Velodyne LiDAR has also opened a new research and development facility in Alameda, CA. Known as Velodyne Labs, this location focuses on building advanced LiDAR, ASICs chip technology, and new solutions to complete and compliment the company's existing LiDAR lineup. facility join existing corporate and production facilities in Morgan Hill, as well as new or expanding sales offices in Northern California, the Midwest, East Coast, Europe, and Asia. Taken together, Velodyne LiDAR has positioned itself in 2017 to increase its leadership position in the development and production of LiDAR sensors that provide 3D vision for industrial applications, UAVs, and a rapidly expanding autonomous vehicle industry. In fact, Velodyne LiDAR is actively hiring in all locations for talent in a multitude of opportunities.

Since then, velodyne LiDAR has emerged as the leading supplier of solid-state hybrid LiDAR sensor technology used in a variety of commercial applications including advanced automotive safety systems, autonomous driving, 3D mobile mapping, 3D aerial mapping and security. The compact, lightweight HDL-32E sensor is available for applications including UAVs, while the VLP-16 LiDAR Puck is a 16-channel LiDAR sensor that is both substantially smaller and dramatically less expensive than previous generation sensors.
